

Honeycomb Block Swap

From Quilt Magazine

Linda Johnson

Fabrics: Please use prewashed quality fabrics. Please exclude 30" prints, novelty, babies, and Christmas.

Finished block size: 3" x 6" A small crib size quilt would take 60 blocks, probably twice that for a lap.

Each block takes two fabrics with contrast between the two fabrics. (For Ex. Light w dark corners, dark w light or medium corners). Pre wash and iron all fabrics. Please do not make more than 6-8 blocks from one fabric so we might have variety.

Cutting: Cut 3 $\frac{1}{2}$ " x 6 $\frac{1}{2}$ " rectangles. For the corners cut 4 - 2" squares of same fabric for each of the rectangles. Sew the four corners on the rectangles with diagonal seams trim and press. Looks like a snow ball block.

Place blocks in a zip lock bag with you name and # of blocks included in your bag on the outside of the bag.
